

WILDFIRE PLANNING STARTS HERE

STRIKER-4™ DUAL FUEL

125 YEARS ON THE FIRELINE. NOW ON YOUR PROPERTY LINE.

Professional high-pressure pumping performance for wildfire property preparedness.

PUT THE WATER YOU ALREADY HAVE TO WORK.

Your swimming pool, pond, or water storage tank could be a valuable resource in your wildfire preparedness plan.

The STRIKER-4™ Dual Fuel is a portable high-pressure fire pump designed to help homeowners, HOAs, and property owners access and move water from available sources.

Built on WATERAX's established STRIKER-4™ platform, it combines a four-stage high-pressure pump with the flexibility of operating on propane or gasoline.

HIGH-PRESSURE PERFORMANCE

Specification	Preliminary rating
Operating performance	81 GPM (307 L/min) @ 175 PSI (12.1 bar)
Maximum shut-off pressure	300 PSI (20.7 bar)
Maximum free flow	103 GPM (390 L/min)
Engine	420cc dual-fuel, 4-stroke
Fuel	Propane (LPG) or gasoline
Propane runtime	Up to 4 hours with two 10 lbs tanks
Starting system	Electric key start + recoil backup
Configuration	Wheeled cart or frame-only

All specifications are preliminary and subject to change.

WHY CHOOSE THE STRIKER-4™ DUAL FUEL?

DUAL-FUEL FLEXIBILITY

Choose propane or gasoline depending on your available fuel supply and operating needs.

NO MORE STALE GASOLINE CONCERNS

Unlike gasoline, propane doesn't degrade during long-term storage, making it a practical option for equipment that may remain unused between wildfire seasons.

UP TO 4 HOURS OF RUNTIME

Designed to operate with two standard 10 lbs propane tanks connected in parallel, providing up to approximately four hours of runtime depending on ambient conditions.

EASY TO MOVE AND POSITION

A rugged wheeled cart makes it easier to transport the pump and position it near your water source.

STRAIGHTFORWARD OPERATION

Electric key start with an onboard battery, backup recoil starter, integrated hand primer, and pressure gauge.

PROVEN WATERAX PUMP TECHNOLOGY

A detachable four-stage centrifugal pump end featuring WATERAX's patented Crossover diffuser technology.

IDEAL APPLICATIONS

- Wildfire property preparedness
- Homes in the wildland-urban interface (WUI)
- Properties with swimming pools, ponds, or water storage tanks
- Areas with limited municipal water supply or pressure
- HOA and community wildfire preparedness programs

FOLLOW US

Propane tanks not supplied. Standard 10 lbs tanks are readily available from local and online retailers. Actual propane runtime depends on ambient conditions, which affect propane vaporization.

Portable pumping equipment is one component of a broader wildfire preparedness plan. It does not guarantee property protection or replace evacuation, defensible space, or professional emergency response.
